JLM BRAND PRODUCTS

- * **YEAST N MORE**- A combination of live yeast, lactic acid bacteria, and digestive enzymes that improve feed efficiency and increase milk production. 1 oz. feeding provides 60 billion live yeast per day and 2 billion bacteria. Product performance backed up with 5 university trials.
- * **SILAGE MAKER BRAND INOCULANTS**-
Three strain bacterial product that improves fermentation of haylage and corn silage.
- * **SILAGE MAKER 125**- 125,000 cfu/gram. Available in 50 lb. dry granular bag and also 50,100, & 500 ton water soluble pkgs.
- * **SILAGE MAKER 250**- 1205,000 cfu/gram. Available in 100, & 500 ton water soluble pkgs.
- * **SILAGE MAKER DRY MOLD INHIBITOR**—50 lb. dry silage inoculant, combines lactic acid bacteria & mold inhibitors to help reduce mold and mycotoxin growth in haylage & corn silage.
- * **SILAGE MAKER MOLD INHIBITOR LIQUID**- One gallon & Half gallon containers.
- * **BALE GUARD** - Buffered liquid hay acid.

- * **SILAGE MAKER OPTI-MAX** - One of the new generation corn silage inoculants. It contains the starch-cleaving LAB strain. Tests done by Dr. Sapienza, Sapienza Analytical WI.

Invitro studies conducted in early 2009 have concluded that OptiMax increased starch/energy, digested dry matter and increased NDF digestibility. The treated cost is \$1.00 per ton OR .3 cents per feeding = .30 income.
